PROFESSIONAL SUMMARY

Full Stack Software Engineer with 10+ years of experience designing, developing and supporting enterprise software solutions for mining, education, agribusiness, manufacturing and industrial environments. Strong background in React, Node.js, .NET, SQL Server, GeneXus and business intelligence, with proven experience in systems integration, process automation, executive reporting and operational platforms. Recognized for translating complex business processes into scalable applications that improve efficiency, traceability and decision-making. International experience in Canada supporting industrial operations and leading field teams, combining technical execution with a practical understanding of real-world operational environments.

TECHNICAL SKILLS

Front-End	React, TypeScript, JavaScript, HTML5, CSS3, Material UI, Tailwind CSS, Formik, Yup
Back-End	Node.js, Express.js, C#, ASP.NET Core, .NET 8 Web API, REST APIs, Socket.io
Databases	SQL Server, MySQL, Oracle, Data Modeling
Tools	Git, GitHub, Jira, Power BI, Swagger, Postman, PDFKit, Puppeteer
Additional	GeneXus (Version 8 and later)
Specialties	Systems Integration, Process Automation, Business Intelligence, Chilean Electronic Invoicing (SII)

FEATURED PROJECTS

DRILL ROD LIFECYCLE MANAGEMENT SYSTEM J.E.J Engineering / Codelco Traceability and condition-control platform for drill rods used in mining operations. Awarded Second Place - Codelco Innovation 2024.
CORRECTIVE ACTIONS MANAGEMENT SYSTEM J.E.J Engineering Platform for incident learning, corrective action tracking, compliance follow-up and automated weekly operational reports.
CORPORATE BENEFITS DELIVERY PLATFORM Agrosuper Web system for assigning and validating employee benefits through automated identity verification and delivery history control.
WORKPLACE ACCIDENT & INCIDENT MANAGEMENT Agrosuper System for recording workplace incidents, medical follow-up, lost-time tracking and corrective action management.
INDUSTRIAL WORKWEAR MANAGEMENT SYSTEM Agrosuper Platform for managing workwear delivery, returns and traceability for more than 1,500 production workers.
EDUCATIONAL ASSESSMENT PLATFORM Strategic Educational Foundation Digital assessment platform used to evaluate over 60,000 students, with advanced reporting and Power BI integration.
ELECTRONIC INVOICING PLATFORM (SII) Apinformatica In-development platform for CAF management, XML processing and Chilean electronic tax document administration.
INDUSTRIAL OPERATIONS MANAGEMENT SYSTEM ODRA / Challenger Manufacturing Concept platform for tracking manufacturing station activities, material usage, execution time and assigned labour.

PROFESSIONAL EXPERIENCE

- **Full Stack Developer | Apinformatica | 2025 - Present**
Developing full stack software solutions, REST APIs and data integrations for technology innovation projects. Contributing to a Chilean Electronic Invoicing platform, including CAF management, XML processing, business rules and document administration.
- **Full Stack Software Engineer | J.E.J Engineering | 2022 - 2024**
Designed and developed software solutions for mining operations, including operational dashboards, management indicators, systems integration and functional analysis. Delivered platforms focused on traceability, operational control, executive reporting and decision support.
- **Development Team Lead | Apinformatica | 2018 - 2022**
Led technology projects, requirements analysis and development team coordination for enterprise software initiatives. Built business applications, systems integrations, reporting tools and business intelligence solutions using Power BI and relational databases.
- **Senior Software Developer | Strategic Educational Foundation | 2014 - 2018**
Developed and maintained educational platforms, optimized databases and built reporting tools for academic tracking and institutional indicators. Contributed to large-scale assessment solutions used across multiple schools and student cohorts.
- **Software Developer | Apinformatica | 2013 - 2014**
Built web-based business applications, supported data modeling, system maintenance and continuous improvement for corporate clients.

CANADIAN EXPERIENCE

- **Technical Support & Industrial Assembly | ODRA Road Sweepers | Canada | 2024 - 2025**
Provided technical support to internal users and production areas, assisted with industrial assembly processes, supported electrical and electronic systems, performed quality inspections and prepared incident reports.
- **Shipping & Receiving Coordinator | Price Industries | Canada | 2025**
Coordinated industrial shipments, maintained dispatch and receiving documentation, registered outbound movements and inspected shipments to ensure operational accuracy.
- **Team Lead | On Side Restoration (H2O Restoration) | Canada | 2026**
Led field inspection and recovery teams, coordinated operational activities, supervised processes and maintained project documentation for restoration-related work.

EDUCATION

Software Engineering and Information Technology - INACAP, Rancagua, Chile. Graduated in March 2015.
